PROFILE

Detail-oriented Computer Science undergraduate aspiring to become a Software Development Engineer in Test (SDET). Hands-on experience designing automation frameworks using Selenium WebDriver, TestNG, REST API testing, SQL validation, and GitHub Actions CI/CD. Passionate about building reliable automated test suites and continuously learning modern testing technologies including Playwright.

EDUCATION

B. Tech in Computer Science

VVIT – Vasireddy Venkatadri Institute of Technology

- Current CGPA: 8.0/10
- Relevant Coursework: Software Engineering, DSA, Database Systems, OS, OOPs, Computer Networks

Expected: 2027

Guntur

Diploma in Computer Engineering

Kallam Haranadha Reddy Institute of Technology 88%

07/2024

Guntur

WORK EXPERIENCE

Quality Assurance Intern

Apex CoVantage Solutions 

12/2023 – 05/2024

Guntur, India

- Executed functional, smoke, sanity, regression, and validation testing, identified defects, verified fixes, and ensured software quality throughout the STLC.
- Logged, reproduced, tracked, and verified defects using Jira, validated backend data with SQL queries, and supported defect resolution throughout the bug lifecycle.
- Participated in release validation by executing end-to-end test scenarios, verifying critical application workflows, and confirming software quality before deployment.

PROJECTS

Enterprise QA Automation Framework

Java, Selenium WebDriver, TestNG, Postman, Maven, WebDriverManager, GitHub Actions

- Designed and developed a reusable QA automation framework using Selenium WebDriver and TestNG, following the Page Object Model (POM) and reusable test automation practices.
- Automated 80+ functional, regression, end-to-end (E2E), API, and integration test scenarios for an examination management system using Selenium WebDriver and TestNG, improving testing efficiency and reducing manual effort.
- Implemented Selenium-based UI automation for critical workflows including student registration, login, examination management, and result verification with reusable page objects and detailed execution reports.
- Designed and executed REST API test suites using Postman by validating positive, negative, and boundary test cases, request/response payloads, authentication, status codes, and business logic.
- Integrated automated UI and API test execution into GitHub Actions CI/CD, generating HTML reports and enabling continuous quality validation on every code change.

StudyAI – Smart AI Study Companion & Quiz Generator

React.js, Flask, Firebase, Groq API, Git

- Developed and tested a full-stack AI-powered study platform with React.js, Flask, and Firebase, performing functional, API, regression, and end-to-end testing to ensure application reliability.
- Built responsive frontend interfaces using React.js and integrated Flask REST APIs with Firebase for data management.
- Performed functional, regression, API, UI, and end-to-end testing on AI-powered workflows including quiz generation, flashcard generation, and summary generation using Postman.
- Executed regression testing after feature updates and collaborated using Git and GitHub for version control.

TECHNOLOGIES

Languages

C, Java, JavaScript, SQL, MySQL,

Tools & Methodologies

Jira, Git, GitHub, GitHub Actions, SDLC, STLC, Agile/Scrum, Test Planning, Bug Reporting, Maven

Testing & Automation

Integration Testing, Functional Testing, Regression Testing, Selenium WebDriver, Postman, JMeter, Manual Testing, Test Automation, API Testing, CI/CD, Playwright (Learning)

Soft Skill

Analytical Thinking, Problem Solving, Communication, Team Collaboration, Adaptability, Edge Case Thinking, Ownership

CERTIFICATES

- Java Programming NPTEL 
- Google Generative AI Essentials L4G 
- Cisco IT Essentials 
- AWS cloud foundations 
- Microsoft Azure AI Fundamentals 
- Scaler Node.js Certification 
- ISTQB Certified Tester Foundation (In Progress)
